

Easy-to-use and Heavy duty!

B&PLUS proposes a brand-new protect tape / RESCUE TAPE

We provide a long life and a good protection of equipment in welding shop!

Features

- High durability!
- High-and-low temperature resistance!
- No glue, No adhesive!

Usage example

All you need to do is wrap the tape around cables or connectors.
 You can protect them from weld spatter and the heat up to 260 degrees.

Welding spatter prevention!

Electric, Pipe or Repair work!

Water and Air leak prevention!

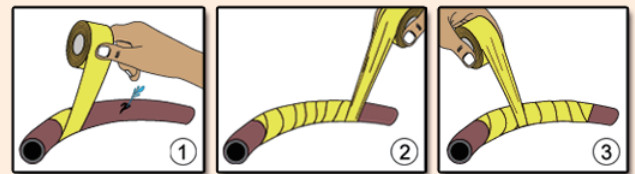

Electrical Insulation!

Specification

Type code	Clear	B-PLUS-TAPE-CL-2536	B-PLUS-TAPE-CL-5011
	White	B-PLUS-TAPE-WH-2536	---
	Black	B-PLUS-TAPE-BK-2536	---
Size	Width 2.5 cm x Length 3.65 m Thickness 0.5 mm	Width 5cm x Length 11 m Thickness 0.76 mm	
Operating temperature	-65...260°C		
Dielectric strength	400 V / 1mil thickness (15748V / mm thickness)		
Moisture absorption rate	3%		
Elongation	300%		
Material	Silicon rubber		

How to use

① Wrap the cable with a layer of the tape.

② Overlap the tape a half-width.

③ After wrapping it, it immediately starts fusion.
